

GRASS HEADS

NON-MESSY

A great activity for anyone who prefers to stay clean and they can get involved in making their grass heads as much as they want. Once it's made they are great fun to watch, as the little grass hairs grow day by day. Chart your growth and then get grass-hair styling!

STEP 1

Decorate your pot!

Get your small pot and decorate it with pens or stick on eyes and a mouth.

STEP 2

Add in some soil or compost, you want to fill in about 3/4 full so there is a little room left at the top.

STEP 3

Sprinkle over your grass seeds, you don't need to add any more soil on top but you do need to give them a little water.

STEP 4

Leave your pot somewhere where it will get some sunlight and wait until some hair starts to grow. It should take around 7 days. Once it does, get styling!
